Objectives

I am a software developer with over two years of successful experience in web and desktop development.As a Front-End Developer, I want to be responsible producing high quality solutions for company customers; bringing deep understanding of Modern HTML, JavaScript, and CSS, and the software development life cycle; and strong ability to execute and implement standard software architecture patterns.

Technical Skills

1. Web: Proficient with HTML, CSS, SVG, Electron, Javascript, D3js and React
2. Desktop: Proficient with Electron.
3. Extensive knowledge of Linux and Windows operating systems.
4. Mobile: Fair knowledge of React Native.

Experience

March 2020 - till date. **EmBED**
Front-end Project Lead (Web)

- Led the front-end team in building **EmBED**; an educational gamified learning platform project.

April 2019 - October 2019. **Learnfatory Nigeria**
Front-end Software Developer

- Led the front-end team in building **Alozie** app project; a software that formats a PDF document.
- Worked with a team of 10 in building **Suregift;** an app that makes the art of gifting simpler but richer.
- Maintained an excellent attendance record, consistently arriving to work on time.
